

Haematopoietic tumours

SOLITARY PLASMACYTOMA

na	Solitary lesion (MRI & FDG-PET)
	No significant protein or Ig abnormality on urine or serum
	Histologic confirmation of plasmacytoma
diag	Solitary, expansile, lytic lesion
Tx	Irradiation
	Stabilisation
	En bloc resection
Prog	Controversial Dx as 50-75% progress on to MM

OSTEOSCLEROTIC MYELOMA

diag	Spectrum of lesions from pure sclerosis to mixed pattern of lytic & sclerosis (hence name)
A/w	P chronic inflammatory demyelinating polyneuropathy
	O organomegaly
	E endocrinopathy
	M M-protein
	S skin changes
Tx	Chemo, plasma pheresis & RTx

Blue all tumours

Lymphoma

Ewing's sarcoma

Rhabdomyosarcoma

Neuroblastoma

Myeloma
